

Fakultätsöffentliche Präsentationen an der Fakultät für Geowissenschaften, Geographie und AstronomieTermin: **Di, 14.06.2022, 13.00 Uhr**

Ort: UZA II, Neumayr Saal 2A502

Uhrzeit	DoktorandIn	Arbeitstitel	BetreuerIn	Dissertationsgebiet
13:00	Tatsii Daria	Parameterization of atmospheric transport processes in the Lagrangian model FLEXPART	Andreas Stohl	Meteorologie
13:30	Xiang Xinxuan	Greenhouse climate control on coal-bearing cycles in the Upper Cretaceous Gosau Group in European Basins	Michael Wagreich	Erdwissenschaften
14:00	Jamaluddin Jamaluddin	Clay mineralogy and organic geochemistry source rocks potential of the Lower Kutai Basin, East Kalimantan, Indonesia	Michael Wagreich	Erdwissenschaften
14:30	Granero Ordonez Paula	Upper Cretaceous nannofossil assemblage changes and events evaluated on a Milankovitch cycle resolution	Michael Wagreich	Erdwissenschaften
15:00	Mohamed Mostafa	Stratigraphy and paleoenvironment of the Eocene successions in Egypt	Michael Wagreich, Petra Heinz	Erdwissenschaften
15:30	Sackl Florian	Geochemical Identification of Projectiles in Impact Rocks	Christian Köberl	Erdwissenschaften
16:00	Fleck Barbara	Combining GIS analyses and numerical modelling to assess groundwater vulnerability of the Hochschwab karst plateau (Northern Calcareous Alps, Austria)	Bernhard Grasemann	Erdwissenschaften
16:30	Asenbaum Rene	Mineral reactions in the geochemical gradient at mafic-felsic contacts during granulite facies metamorphism	Rainer Abart	Erdwissenschaften
17:00	Milos Sofija	Crystallography, properties, and polymorphism of dense potassium-bearing carbonates at extreme P, T conditions	Ronald Miletich-Pawliczek	Erdwissenschaften
